In Search of the Northern Lights

Fred Olsen Borealis - Departs Liverpool – 13th November 2022 – 11 Nights – S2228A

After crossing the Arctic Circle, *Borealis* guides you on an unforgettable adventure amongst the rugged wilderness of the Arctic region in search of the northern lights. The Arctic landscapes surrounding Tromsø are considered some of the best places on earth to see Aurora Borealis;— we may be fortunate enough to see Mother Nature's remarkable light show -the night sky dancing ribbons of colour.

In Tromsø, see the city's many famous sites, the Arctic Cathedral, or ride the cable car up Mount Storsteinen. During a visit to Alta sample the fascinating lifestyle of the Sami people, while the UNESCO-listed rock carvings of Hjemmeluft can be seen at the Alta Museum. We also stop at Bodo, on the beautiful Kystriksveien Coastal Route, where you'll discover mountainous landscapes best explored via a traditional husky-led sled. In the beautiful Vesterålen archipelago, miles of rugged coastline, and the 'Blue Town' of Sortland – almost entirely painted in various blue hues. Experience scenic cruising by Torghatten and the Seven Sisters mountains too; and enjoy time in Alesund too.
